## **CURRENT SYMPTOMS SUMMARY**

Ivai	me:Date:		
This document will summarize your problems or concerns, improving your team's understanding of you and your Parkinson's and helping them to effectively tailor your treatment.			
I have trouble in the following areas that may be affected by my treatment, hospital stay or procedure:			
Motor Problems			
	Balance problems		
	Communication and speech difficulties		
	Dyskinesia – uncontrollable movements usually caused by medication		
	Dystonia – involuntary muscle spasm, contraction leading to pain, flexion or twisting movements		
	Freezing of gait or motor initiation problems (feet stuck to floor)		
	"On/off" fluctuations – periods of time when my medications are "on" that I can move better and when my medications are "off" and I have difficulty moving. "Off" periods usually happen as my medication is wearing "off." To reduce this problem, I must have my Parkinson's medications on time.		
	Swallowing problems		
Non-Motor Problems			
	Anxiety		
	Apathy or trouble self-initiating tasks		
	Bladder problems		
	Constipation		
	Depression		

	Cognitive problems
	☐ Memory problems or mild thinking difficulties
	Dementia
	☐ Hallucinations or sensitivity to hallucinations with certain medications
	Drooling
	Excessive sweating or chills
	Fatigue
	Impulsivity problems
	Loss of smell or loss of appetite
	Pain in these areas:
	Sleep problems
	☐ Trouble staying asleep
	☐ Restless legs syndrome
	$\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ $
	☐ Sleep apnea
	REM sleep behavior disorder: vivid, active, physical dreaming
	☐ Daytime sleepiness
	Sensations such as tingling, aches, pain, cold hands/feet
	Sexual dysfunction
	Vision problems
